

Clean Technology & Renewable Energy Appetite Guide.

Reach out to your Revau underwriter to discuss renewable energy, energy storage, clean technology, and supporting contractor opportunities.

Renewable Power & Storage

- Utility-scale solar farms
- Commercial and industrial scale solar installations
- Utility scale wind energy projects
- Small run of river hydro facilities
- Biomass operations
- Renewable natural gas (RNG) production
- Independent power producers
- Battery energy storage systems (BESS)
- Contractors supporting the renewable power industries

Clean Technology

- Energy management technology firms
- EV charging infrastructure operators
- Carbon capture and decarbonation technologies
- Hydrogen technology companies
- Clean fuel producers

Quick Quote Submission

To receive a fast and accurate quote, please include:

- Statement of values, construction details, site information, project overview, and loss history.
- Detailed operations description, revenue breakdown, contract structure, subcontractor exposures, and environmental exposures.
- For construction projects: project values, schedule, site plans, contractor details, and engineering information.

You can expect contact from an underwriter within **48 hours** of receipt of submission documents.

Why Brokers Choose Revau

- Specialized underwriting for renewable generation, BESS, construction, and environmental exposures
- Flexible property, casualty, environmental, professional, and specialty solutions
- National appetite with shared and subscription placement capability
- Domestic and international market access
- Responsive underwriting for evolving energy-transition businesses

Our Sweet Spot

- Strong health and safety culture
- Proven technology and operating history
- Experienced management teams
- Established maintenance practices
- Effective environmental management
- Positive claims history
- Commitment to risk management
